PRNTR.AI: the offer and the funnel, end to end

Built from the scaling videos you gave me (about 25 videos, 113,000 words). Where a choice is mine rather than his, it says so. His numbers are his own claims.

1. The offers

There are only two things for sale to the public, plus one thing only students can buy.

	What	Price	Who gets it
Main offer	1-on-1 Mentorship, 90 days: memecoins + copy trading, leverage, and the money loop between them	**$3,000** pay in full, or **2 × $1,700**, or **3 × $1,200**	Pitched on every call
Downsell	Both courses: the memecoin and copy trading course + the PRNTR trading course	**$997**, or **2 × $550**	Only people who can't afford or don't want 1-on-1
Student-only	Signals after the mentorship ends	**$149 / month**, or a **limited lifetime seat at $2,500** (max 25)	Offered in week 10–12

Why these prices (his rules)

- **Start with 1-on-1.** He says it's the easiest to sell at the start and gives the best results and testimonials. Under $10K/month you sell it yourself.
- ***4K–6K* is his normal range** for a first trading mentorship. You've set **$3,000**, which is easier to sell while your audience and testimonials grow. His own check says when to raise it: once you close more than 60% of calls, or 1-on-1 starts filling up.
- **Payment plans always cost more than paying in full**, and more the more it's split, so paying in full looks best.
- **Pay-in-full clearance:** anyone on a plan can pay off the rest at the pay-in-full price within 30 days. Example: paid $1,700, clears with $1,300 instead of another $1,700. He says this lifts cash and plan completion.
- **Downsell at 500–1,000**, with no calls, so it costs you no time. $997 fits.
- **Never sell lifetime coaching or lifetime community.** That's why lifetime is only for signals, capped, and worded "for the life of the service".

His three pricing checks (do these monthly)

1. **Close rate:** over 60–80% of calls = raise the price. Under 20–30% = too high, or the wrong people are booking.
2. **Cash vs contract value:** if over 90% of the contract value is collected up front, you're underpriced.
3. **Your hourly rate:** $3,000 ÷ about 15 hours of your time per student ≈ $200/hour. When your time is worth more than that, raise the price.

The mentorship: what's inside

- A 1-on-1 call every **two weeks** (6 calls). Not weekly: he says people bring real questions to bi-weekly calls and chat covers the rest.
- Direct chat with you between calls.

- The full PRNTR course, workbook and slides.
- All signals for 90 days.
- The member dashboard (their trades and win rate).
- **Three phases**, so students finish and keep paying their plan:
  - Weeks 1–4, Protect: setup, risk and sizing, signals at small size, journal.
  - Weeks 5–8, Build: why trades are taken, managing a trade, profit-taking, trade reviews.
  - Weeks 9–12, Independence: their own written plan, scaling slowly, results interview, signals offer.
- **14-day refund** if it isn't what was described. Guarantee what you control, never profits.

The course: what's inside

Two courses for $997: **the memecoin and copy trading course** (8 lessons: security and scams, finding and checking wallets, copy trading in practice, entering while the hype builds, taking profit, moving profits out) and **the PRNTR trading course** (15 modules; Part 1 is done). No signals, no calls. What they paid counts toward the mentorship if they upgrade within 90 days.

---

2. The full journey of one person

```
Reel / short / YouTube / story
  → "DM me BOT" (ManyChat)  or  link in bio / description
      → Free guide + 6 emails + free Discord        (not ready yet)
      → prntr site → watch video → APPLY
          → budget $1K–$3K or more, not brand new → BOOK A CALL (next 4 days) → "You're
booked" page → reminders → CALL
                → buys mentorship (pay in full / 2-pay / 3-pay)
                → can't afford → course offered on the call
                → not now → follow-up messages, then the email list
          → under $1K or brand new  → COURSE PAGE ($997)
                → you message them anyway: some understated
                → course buyers → upgrade offer later
  → student → onboarding → 90 days → results interview → signals offer
```

---

3. The website (built: prntr-ai.onrender.com)

Page	Job (his rule: each page only sells the next step)
`index.html`	Watch the video, then apply. Live tracker, story, proof, testimonials. **No price** on this page.
`apply.html`	7 short questions, one at a time. Sends each person to booking or to the course.
`book.html`	The calendar, with their answers already filled in.
`booked.html`	"Congratulations, you're booked", the before-the-call video, "reply YES", what to prepare.
`course.html`	The $997 downsell. When someone comes from the application, it opens with "From your answers, the mentorship isn't the right fit yet".

The one file you edit for links: `prntr_site/config.js` (Calendly link, course checkout, Instagram handle, videos, monthly spots, minimum budget).

Who gets a call

- Budget answer "1, 000–3,000" or higher, and not "new to trading" → booking page. The 2-payment plan starts at $1,700, so these people can buy on the call.

- Everyone else → course page.

This matches his filter (under $1,000 goes to the downsell). Change `minBudget` in `config.js` if you want it stricter.

I left out his country filter on purpose. The budget question already does that job person by person.

Setting up Calendly (15 minutes)

1. Make one event: **"Mentorship call"**, 45 minutes, Zoom or Google Meet.
2. **Date range:** 4 days into the future. He says show rate "drops drastically" for calls booked a week out.
3. **Minimum notice:** 4 hours. **Buffer:** 15 minutes after each call. Up to 3 calls a day.
4. **Invitee questions, in exactly this order** (the site fills them in for you):
    1. Phone number
    2. Which describes you best?
    3. Biggest struggle right now
    4. Goal, and why now
    5. Budget / Instagram
5. **Confirmation page → "Redirect to an external site"** → `https://prntr-ai.onrender.com/booked.html`
6. **Workflows** (reminders, section 5 below).
7. Paste the event link into `config.js` → `calendly`.

Keeping every application, including people who don't book

Without this, people sent to the course page leave no record. Free option: make a **Formspree** form (or a Make/Zapier webhook into a Google Sheet) and paste its URL into `config.js` → `formEndpoint`. Every application then lands in your inbox or sheet, and you can message the "under $1K" ones; he says some understate.

Videos you need to record

Video	Length	What it says	Where
Apply video	5–8 min	Script already written (Day 2 kit). Its only job is the click on "Apply".	`vslLanding`
Before-the-call video	10–15 min	How the 90 days work, what they get, who it's for, student results, what happens on the call.	`vslBooked`
Course video	3–5 min	What's in both courses, who they're for, the upgrade credit.	`vslCourse`
3 pre-call videos	5 min each	Overtrading · sizing and liquidation · giving back profits. Sent before the call to match their struggle.	Sent by message

---

4. ManyChat (Instagram)

His method: the call to action on stories and reels is a **DM keyword**, and ManyChat replies with a **voice note** you recorded once. "Voice notes work so good" because they feel personal. Let the bot say it's automated if someone asks, and never promise returns.

Keyword BOT (free guide, for people not ready yet)

1. Trigger: comment or DM "BOT".
2. Wait 20–40 seconds. Send your voice note:

> "Hey, it's [name]. Thanks for reaching out. I'm sending you the guide right now. Quick question while it comes through: how long have you been trading, and what's been the hardest part?"

3. Ask for email → send the guide → add them to the 6-email sequence.
4. When they reply:
   - Serious and has traded a while: "Sounds like the mentorship could fit. Here's the 2-minute application: [site]/apply.html"
   - Brand new: "Start with the guide and the free Discord. When you're ready, the course is here: [site]/course.html"

Keyword MENTOR (people already interested)

1. Voice note:

> "Hey, it's [name]. I take [5] new 1-on-1 students a month because it's me on every call. Tell me where you're at with trading right now, and if it sounds like a fit I'll send you the application."

2. They answer → send the application link.
3. Not now → free guide and emails.

Rules

- Only say a number of spots if it's true.
- You answer DMs yourself until you hire a setter (around 25*K*–30K a month).
- Put "MENTOR" in your bio: "DM MENTOR for 1-on-1".

---

5. Messages around the call

Reminders (he says 4–6, never 12)

When	Channel	Message
Right after booking	Email + you message on IG/WhatsApp within minutes	Confirmation, link to the before-the-call video, "reply YES"
1 day before	Email	A short student story that matches their struggle
6 hours before	Email	"Here's what we'll cover" + the call link
2 hours before	Instagram DM or WhatsApp	"Looking forward to it. Still good for [time]?"
1 hour before	Email	Call link
15 minutes before	Text	Call link
5 minutes after start, if no show	Text + DM	"I'm on the call now, still joining?"

Pre-call video

The day before, send the one 5-minute video that matches their answer (overtrading, sizing, or giving back profits): "Made this for people in exactly your spot. Worth 5 minutes before we talk."

The three rescue sequences (he estimates 10–20% extra revenue)

1. **Started the application, didn't finish** (needs `formEndpoint`): message the same day.
2. **Booked, didn't show:** two messages over 2 days to rebook. Then into the email list.
3. **Had the call, didn't buy:** follow up after 2 days with an answer to their specific objection. Offer a second call, or the course.

---

6. The call (30–45 minutes)

His five stages, in order:

1. **Agenda** (2 min): "I'll ask about your trading, then if I think I can help, I'll show you how. If not, I'll tell you. Fair?"
2. **Discovery** (15 min): where they are, what they've lost, their goal, why now, what's stopping them, what it costs to stay where they are. Use their application answers.
3. **Pre-handle objections** (5 min): raise the usual doubts before they do: small account, time, "is it too late", "why not just signals".
4. **Pitch** (8 min): the 90 days as the bridge from where they are to where they want to be. The three phases. What they get.
5. **Close** (5 min): price, pay in full or a plan, the 14-day refund, the pay-in-full clearance. Take payment on the call.

- Can't afford it → offer the course on the call.
- Doesn't fit → say so and point them to the free content.
- Record every call (Fathom). Aim to talk 40–50% of the time, not 90%.

---

7. After someone buys

1. Payment (Whop) → contract signs automatically (PandaDoc/DocuSign) → welcome email.
2. Discord role, signals on, dashboard access.
3. **"Why did you buy?" form** (15 questions, 5 minutes): what made you buy, the tipping point, what nearly stopped you. After about 50 answers you'll know exactly what to say in content.
4. First call within 7 days.
5. Week 4: feedback form (what's good, what's missing).
6. **First result → interview them right away** for content.
7. Weeks 10–12: the signals offer ($149/month or a lifetime seat) and an invitation to keep working with you.
8. **Course buyers:** at day 30 and day 75, "what you paid counts toward the mentorship within 90 days" → application link.

---

8. Tracking (one Google Sheet, one row per person)

`Date · Name · Source · Applied · Budget · Booked · Showed · Bought · Offer · Plan · Cash collected · Contract value · Notes`

Every week, work out:

Number	His benchmark	If it's low
Visits → applications	—	The apply video or the headline
Applications → booked	~40–45% of qualified	Calendar friction, the booking page
Show rate	70–80%+	Reminders, the before-the-call video, your message right after booking
Close rate	30–50%	Discovery, objections, the pitch
Cash per call	700–2,000	Pricing, plans, pay in full
Cash ÷ contract value	60–70%	Over 90% = raise prices

Wait for **50 or more** of anything before trusting a percentage. Change one thing at a time.

---

9. Timeline

When	What
Days 1–2	Calendly set up, links in `config.js`, apply video recorded, journey story sequence, 20 warm messages
Days 3–7	Before-the-call video, reminders, first YouTube video, ManyChat BOT + MENTOR, first calls
Week 2	Free guide, 6 emails, 3 pre-call videos, editor hired, Formspree connected
Week 3	Course recorded (Parts 2–5), course on Whop, onboarding automated
Week 4	Review every number, fix the weakest one, first student interview
Dec → mid-Jan	14-day pre-launch and New Year opening (his "gold mine" angle)

When to change the model (his phases)

Monthly cash	Change
0–10K	You do everything: content, DMs, calls, delivery. 2–4 sales a month.
10*K*–30K	Hire an editor and a thumbnail designer. 6 YouTube videos a month.
10–15 students at once	Raise the 1-on-1 price. Build a group mentorship as the new main offer (4*K*–6K), and 1-on-1 becomes the upsell ($10K+).
25*K*–30K	First hire: a **setter** (DMs, reminders, no-shows). Then a closer at about 10% commission.
$100K+	Sales manager, assistant. Only now consider ads.

---

10. Things he does that I left out on purpose

- "Guaranteed six-figure trader" headlines and $1,000 refunds tied to results.
- A spots counter coded to drop by itself, and "reply YES or your call is cancelled" when it won't be.

- A setter writing as you, or videos faked to look personally recorded.
- Blocking whole countries by phone number.

None of them are needed for the structure to work, and each one is a risk to your name.
