Start here: your 14-day schedule

One rule: **do only today's box.** Don't read ahead, don't tidy, don't improve yesterday's work.

Who does what

I write	Every script, message, email, page text, form question, checklist and template. You copy and paste.
You do	Record yourself, click "create" in the tools, post, and take the calls. Nobody else can do these.
Hire out	Video editing and thumbnails (one freelancer, from Day 8).
Automated	Reminders, DM replies, emails, onboarding (set up once in week 2).

Each day is 1.5–3 hours. Things marked ✍ are already written for you in the kit files.

Week 1: get the door open

The goal of week 1 is small: someone can apply, book a call and pay you.

Day 1 · Open the door (2.5 h)

1. Create the mentorship on Whop: $5,000 in full, or 2 × $3,000. ✍ description in the Day 1 kit.
2. Make the application form (Typeform or Whop form). ✍ 5 questions in the kit.
3. Make a Calendly event: 45 minutes, next 4 days only, 3 slots a day. Put the form in front of it.
4. Start a Google Sheet. ✍ column names in the kit.
5. Send the warm message to 10 people. ✍ in the kit.

Day 2 · Tell your story (2 h)

1. Record the page video on your phone, one take per section. ✍ script in the kit.
2. Post the 5-slide journey story sequence and save it as a highlight called "My story". ✍ slide text in the kit.
3. Put the application link in your Instagram bio.

Day 3 · First long video (3 h)

1. Record YouTube video 02, the doctor story, using your script and `00_HOW_TO_RECORD.md`.
2. Send the warm message to 10 more people. Reply to yesterday's answers.

Day 4 · Proof (1.5 h)

1. Make a "Proof" highlight: your real screenshots, the bot results page, testimonials you have permission to use.
2. Post one reel: 30 seconds of you saying the hook from video 02.
3. Take any calls that are booked. ✍ call checklist arrives before Day 4.

Day 5 · After-booking video (2 h)

1. Record the after-booking video (10–15 min). ✍ script arrives before Day 5.
2. Add it to the Calendly confirmation page.
3. Post one reel.

Day 6 · Batch day (3 h)

1. Film 4 reels in one sitting. ✍ hooks arrive before Day 6.

2. Film YouTube video 03 (why I built a bot).

Day 7 · Review (1 h)

1. Fill in the sheet: people messaged, applications, calls booked, calls taken, sales.
2. Tell me the numbers. I'll tell you the one thing to fix.
3. Rest.

End of week 1 target: 20 people messaged, 3–5 calls booked, 1 YouTube video recorded.

Week 2: catch the people who aren't ready yet

Day 8 · Hire the editor (1.5 h)

1. Post the editor job. ✍ job post arrives before Day 8. Send them video 02 as the test.
2. Post one scheduled reel. Take calls.

Day 9 · Free guide (1.5 h)

1. Read and approve the free guide. ✍ I write it; you fix anything that isn't true to you.
2. Record the 20-second ManyChat voice note. ✍ script arrives before Day 9.

Day 10 · ManyChat (2 h)

1. Set up the keyword BOT in ManyChat: voice note, ask for email, send the guide. ✍ every message written.
2. Post a value story sequence ending "DM me BOT". ✍ slides written.

Day 11 · Emails (1.5 h)

1. Paste the 6 emails into Kit and switch the sequence on. ✍ all six written.
2. Publish YouTube video 02 (edited). Link it in stories.

Day 12 · Reminders (1.5 h)

1. Paste the reminder messages into Calendly. ✍ written.
2. Record pre-call video 1 (5 min): overtrading. ✍ outline written.

Day 13 · Batch day (3 h)

1. Film 4 reels and YouTube video 04.
2. Start the daily series: "Day 1: my bot's trades today".

Day 14 · Review (1 h)

1. Fill in the sheet. Send me the numbers.
2. Ask every buyer so far: what made you say yes? What nearly stopped you?
3. Decide with me: start the course recording in week 3, or keep selling.

End of week 2 target: 8–10 calls taken in total, first 1–2 students, the free guide collecting emails.

What to expect, honestly

- Your first sales will come from **people who already follow you**, through the warm messages and stories. YouTube takes weeks to start sending buyers.
- A realistic first month is **2–4 students** (10*K*–20K collected), not a flood. That is a good first month in his own numbers.

- Skip the course until you have students. It's the downsell, and it can wait until week 3.
- The trading bot is not touched by any of this.

Kit for Day 1 and Day 2: copy, paste, record

Replace anything in **[brackets]** with your real facts. Never round a number up.

DAY 1

1. Whop product

Name: 1-on-1 Trading Mentorship (90 days)

Price: $5,000 one-time · or 2 payments of $3,000 (30 days apart)

Description:

> 90 days working directly with me to trade leverage with a system instead of gut feeling.
>
> What you get:
>
> - A private call with me every two weeks
> - Direct chat with me between calls
> - My full method in plain language: risk, position sizing, taking profit, and moving gains into a trading plan
> - Every signal my bot takes, for all markets, for the full 90 days: entry, stop and targets
> - Your own dashboard showing your trades and win rate
>
> Who it's for: people who have traded for 6 months or more, have lost money on leverage or given back gains, and are ready to follow rules.
>
> Who it's not for: anyone looking for guaranteed returns, or trading money they can't afford to lose.
>
> 14-day promise: if the mentorship isn't what I described, tell me within 14 days and I'll refund you in full.
>
> Trading with leverage carries a high risk of loss. Results are not typical and not guaranteed. This is education, not financial advice.

2. Application form: 5 questions

1. **What's your biggest struggle with trading right now?** (long answer)
2. **What's your goal, and why now?** (long answer)
3. **Which describes you best?** (pick one)
   - New to trading
   - Trading under a year
   - Trading 1+ years, not yet profitable
   - Profitable, want to scale
4. **This is 1-on-1 mentorship, not a signals group. What can you invest in getting this right?** (pick one)
   - Under $1,000
   - 1, 000–3,000
   - 3, 000–5,000
   - $5,000+
5. **Your Instagram handle** (short answer)

Also collect: first name, email, phone.

What to do with the answers: $3,000+ → book the call. Under $3,000 → send them a kind message, add them to the free guide list, and offer the course when it exists.

3. Calendly settings

- Event name: **Mentorship call with [your name]**
- Length: 45 minutes
- Availability: 3 slots a day at times you can always keep
- Scheduling window: **4 days into the future**
- Minimum notice: 4 hours
- Confirmation message:

> You're booked. Before our call, watch the short video I'll send you, and reply YES to my email so I know you got it. Come with your last few trades in front of you.

4. Tracking sheet columns

`Date | Name | Where they found me | Applied | Budget answer | Call booked | Showed | Bought | Offer | Cash collected | Notes`

One row per person. Fill it in the same day.

5. Warm message (send to 10 people)

Send to people who have asked about your trading, past students, and followers who reply to your stories. Use their name. Send one at a time, not a blast.

> Hey [name], quick one. I'm taking on a few people 1-on-1 for 90 days to trade leverage the way I do now, with my system and my bot's signals. You came to mind because [real reason: you asked about my trades / you've been at this a while]. Want me to send you the details?

If they say yes:

> Here's the short version: 90 days, a call with me every two weeks, direct chat in between, and every signal my bot takes. There's a short application so I can see if it's a fit, then we get on a call: [link]

If they don't reply after 2 days (once only):

> No pressure at all. I only have room for a few, so I wanted to make sure you saw this before I open it up.

If they say not now:

> All good. I'm putting together a free guide on how my bot decides what to trade. Want me to send it when it's ready?

DAY 2

6. Page video script (5–6 minutes)

Record on your phone, facing a window. One section per take. This video has one job: get them to click "Start application". It does not explain the whole program.

[HOOK]

If you've been trading leverage for a while and you keep ending up back where you started, or worse, this is for you. Give me five minutes.

[WHO I AM]

I'm [name]. I was a [specialty] doctor. In [year], I put seven thousand dollars into the market, and over [time] it became one point one million. I left medicine to trade full time.

[Show the proof on screen for a few seconds.]

But I want to tell you the part people don't post.

[THE PROBLEM]

After that run, I nearly gave a big part of it back. [One honest sentence about what happened.]

And I realised my problem wasn't the market. It was me. I traded more when I was emotional. I moved my stops. I couldn't tell my skill from my luck.

If you've ever closed a trade and thought, "why did I even take that," you know exactly what I mean.

[WHAT CHANGED]

In medicine we use checklists. Not because doctors aren't smart, but because smart people make mistakes when they're tired or under pressure.

So I wrote down every rule from my best trades and turned them into a system. Then I built a bot that follows those rules, on hundreds of markets, without ever getting bored, scared or greedy.

Most days, it does nothing. It skips almost everything. That's the point.

Every trade it takes goes on a public page. The wins and the losses.

[WHO THIS IS FOR]

I'm now working with a small number of people one-on-one, for ninety days.

It's for you if you've traded for at least six months, you've lost money or given back gains, and you're ready to follow rules instead of feelings.

It's not for you if you want a guarantee, or you're trading money you can't afford to lose. Nobody can promise you profits, and I won't.

[WHAT TO DO NEXT]

I can only take a few people at a time, because it's me on the calls.

If this sounds like you, click the button below and fill in the short application. It takes two minutes. If it looks like a fit, you'll pick a time and we'll talk about where you are and whether I can help.

That's it. Click below.

7. Journey story sequence (5 slides)

Background: a photo of you on each slide. Hook text big, at the top, in a bright colour. Add an arrow on slides 1–4. Save all five to a highlight called **My story**.

Slide	Big text	Small text	Image
1	**I was a doctor. I quit after one trade changed everything →**	Watch to the end	You in scrubs, or at the hospital
2	**$7,000 became $1.1M →**	[Month/year] to [month/year]	Your real proof screenshot
3	**Then I nearly gave it back →**	[One honest line: what went wrong]	A plain photo of you
4	**So I turned my rules into a bot →**	It skips almost everything. Every trade is public.	Screen recording of the results page
5	**I'm taking a few people 1-on-1 for 90 days**	Want the details? DM me the word MENTOR	You, looking at the camera

When someone sends MENTOR, reply with the "If they say yes" message from section 5.

After Day 2, tell me: how many people you messaged, how many replied, and whether anyone applied. I'll have the sales-call checklist and the after-booking video script ready for you.
